100

- 1.) The painting Leonardo ~~Divine~~ made was the Mona Lisa.
- 2.) A crack in the backround of the Mona Lisa was repaired.
- 3.) Two special features about the Mona Lisa is the way he uses the sfumato and another is the use of perspective. The sfumato is fine shading and the perspective makes the background look further away and down.
- 2.) The clock mechanism. Used to regulate the rotation of the mechanism at set slow or fast intervals. The Steam Cannons is used to make steam to fire ammunition.
- 3.) Leonardo ~~was~~ used perspective in his paintings to show people exactly what he sees. To show depth and distance on flat space.

4.) C Chiaroscuro is defined as a bold contrast between light and dark. It's highlighting and shadowing. sfumato is a technique that overlaps layers of translucent layers of color to show depth and perspective

5.) A.) The title is The Lady with an Ermine

b.) - Both the Mona Lisa and The Lady with an Ermine ~~are~~ have some sort of veil on. Both standing portraits that you cannot ~~so~~ tell whether ~~the~~ the person is smiling or frowning,

C) The last Supper
