Your personal response to my evaluation of your work.

I'm very happy with my work, because I worked very hard on my project, especially with my picture. After these changes, everybody should get a good score. I think I improved a lot from my first draft, but I could have included more of a background of the object. For instance, where my grandparents bought it? Why my father inherited it? and why they bought the table if they had eight children? Even though I think I could have done more research, I'm very proud of my work.
